

Shippit API instruction

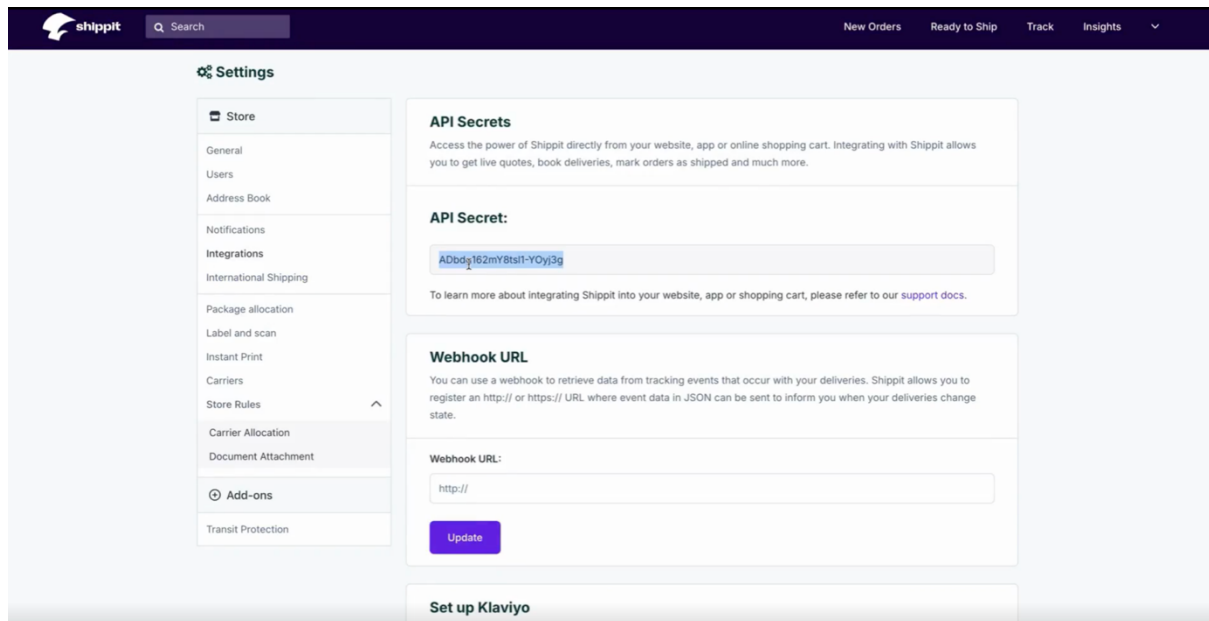

If you're using Shippit as your delivery partner, start by going to Store Settings, then Scroll down to Shipping Settings and select Shippit from the Shipping Service drop down.

Next, head over to Ship It and log into your account. Click the arrow in the top menu, then select Settings.

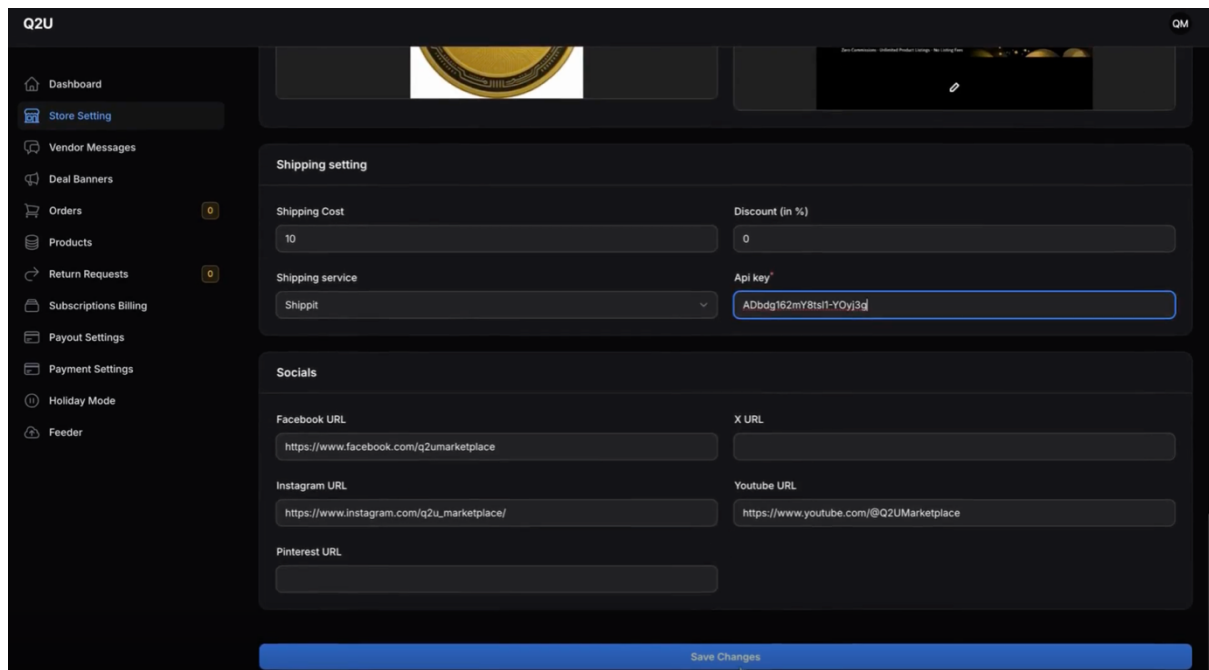

In the left-hand menu, choose Integrations, where you'll find your API secret.

Copy the API secret, go back to Q2U and paste it into the API Key field.

Click Save Changes and you're all set.

Customers will now see delivery fees calculated by Shippit at checkout.
